Acceptable Use of Technology

Aspen View Public School Division encourages the responsible use of technology devices and contemporary digital tools in our schools to assist with instruction and learning. Therefore, all students within Aspen View Public School Division are eligible for Aspen View network services. These technology devices, digital tools and services include hardware, internet electronic mail (email) and/or digital collaboration access to cloud-based services for documents and other educational activities.

A detailed Administrative Procedure titled “Use of Cloud-Based Applications and Data Storage Facilities” and an Aspen View Technology Code of Conduct clearly articulate the responsibilities of all members and stakeholders within Aspen View Public School Division in regards to the use of technology, online resources and cloud-based services. Students and/or parents need to provide informed consent before access is provided to the Aspen View network services.

Access to digital services are provided primarily through access to Windows-based and cloud-based services with a provided student login to the Microsoft Windows servers and Google-based services that connect to the Internet. Many teachers will also include educational activities during the learning day using various online digital services designed to meet educational goals.

Acceptable Use of Technology Cont'

Students are prepared to use technology properly and to access online tools and learning environments through specific instruction in Digital Citizenship. This is reviewed each year as students move from grade to grade in order to emphasize responsible hardware use and responsible online behavior. Despite Canada's Anti-Spam Law and Aspen View's best technical efforts to block offensive, inappropriate, suggestive, or otherwise obnoxious email (SPAM), staff may still have the potential to receive these at times. Through our district approach to proactively teaching Digital Citizenship skills, students are taught to exercise regular and appropriate caution before providing any personal information over the Internet through email or other social communications from home or from school-based technologies.

To obtain an account within the Aspen View network services, the school principal in the student's school must be satisfied that the student understands The Aspen View Technology Code of Conduct and related school or division procedures around acceptable behaviors. Your child's teacher has reviewed the Aspen View Technology Code of Conduct with the class as well as related expectations and we encourage parents to also review the information in this document with your child. Only upon parental consent can the school administration approve an Aspen View network services account for a student.

Administering Medicine to Students Aspen View Public Schools Division

Background

The Division recognizes that good health is basic to the ability of students to achieve their personal and educational goals. Parents are responsible for advising the school of a student's health needs and for providing the school with information about health problems that could affect the student's behavior, learning and/or the wellbeing of other students and staff. Students who require medication are expected to take it at home under the direction of a parent.

While administering medication to students is not a responsibility of schools, staff members may be requested to do so. The administration of medication may be done only after:

- a)** the use of the medication is prescribed by a physician; and
- b)** other reasonable options, such as self-administration or parental administration, are determined to be impracticable; and
- c)** a properly completed and signed Request for Administration of Medication to Student and Release form (Form 316-1) has been received from the parent and approved by the principal; and
- d)** the principal has determined that sufficient resources are available in the school.

The Division reserves the right to reject requests for the administration of medication to students.

Procedures

1. A parent may make a request, through the principal, that medication be administered to a child during school hours or during school-sponsored events. Such requests shall be in writing, on the Request for Administration of Medication to Students and Release form (Form 316-1) properly completed by the parent and physician and approved by the principal.
2. No staff member shall administer any medicine to a student unless the conditions in procedure 1 above have been met.
3. All medication brought to school pursuant to procedure 1 above shall be kept in a secure location. The medication must be in the original prescription container, clearly labeled and specifying the name of the medication, instructions regarding the dosing schedule, method of administration and storage information (including any expiry dates).
4. Students who bring medicine to school or to school-sponsored events, for self-medication, shall be responsible for keeping secure their medications and medical equipment (e.g. epi-pens).
5. The Student Medication Schedule (Form 316-2) shall be completed by the staff member administering the medication and retained by the principal for that school year.
6. All forms that contain information regarding medication, including the approved Request for Administration of Medication to Students and Release, are to be placed in the Student Record File.
7. The Request for Administration of Medication to Students and Release form (Form 316-1) and the Student Medication Schedule form (Form 316-2) are valid only for the school year. Each form must be updated by the parent during the school year to reflect any change in student medication, in accordance with procedure 8 below.
8. The parent shall advise the principal, immediately and in writing, of any changes in the medication, medication schedule, or any other matter affecting the administration of medication to the student.
9. It is the responsibility of the parent to provide the school with a proper supply of medication and to ensure that the medication does not pass its expiry date and that any medical devices or equipment are in proper working condition.
